DETAILED ACTION

Drawings

New corrected drawings in compliance with 37 CFR 1.121(d) are required in this application because the current drawings are not in compliance. Applicant is advised to employ the services of a competent patent draftsman outside the Office, as the U.S. Patent and Trademark Office no longer prepares new drawings. The corrected drawings are required in reply to the Office action to avoid abandonment of the application. The requirement for corrected drawings will not be held in abeyance.

REASONS FOR ALLOWANCE

The following is an examiner's statement of reasons for allowance: Claims 1-21 are allowed as the prior art, in particular, Hallidy (US 2002/0043954), Keim et al. (US 2003/0075997), and Baker (US 5,493,201), does not teach or suggest the applicant's invention. Claims 1, 8, and 15 teach a method and for energy recovery in a hard disk drive. The distinguishing elements of the claims teach a spindle resolver that generates transition signals as a spindle motor of said hard disk drive rotates among angular regions; a spindle region state machine, coupled said spindle resolver, that receives said transition signals and generates rectifier drive signals based thereon; and a synchronous rectifier, coupled to said spindle region state machine, that employs said rectifier drive signals to recover electrical energy from said motor.
